## BAYNE REVOLUTION™ LIFTER ADJUSTS FOR UNEVEN TERRAIN

**Greenville, SC.** (January 19, 2012) — The Revolution™ from Bayne Premium Lift Systems is an advanced modern cart lifter. Bayne's patented design incorporates a sweeping action that automatically adjusts for uneven terrain, preventing operators from having to lift carts onto the lift plate. The Revolution was specifically designed to offer 22 inches of ground clearance, the most ground clearance possible for rear-load applications. This feature makes it a perfect choice for applications with commercial container lift bars and provides the versatility to pick up both residential and commercial waste on the same route. In addition, the Revolution dumps carts higher and deeper inside the hopper opening to prevent spillage and increase the number of route stops before cycling the packer blade.

For more information about the Revolution lifter or other Bayne mobile and commercial/industrial lifters, please visit [www.baynethinline.com](http://www.baynethinline.com) or call toll-free 800.535.2671.

*Bayne Premium Lift Systems is the leading manufacturer of cart tippers and carry cans in the waste industry. Best known for their exclusive Thinline® lift with rack and pinion actuator, Bayne also produces lift systems for industrial use, including compactor and baler loading systems. Bayne is part of Environmental Solutions Group.*
